## Health & Safety

We offer a wide range of Health and Safety courses that can be used to boost safety and compliance in the workplace. Our courses range from Fire Extinguisher training to Banksman and Abrasive Wheels.

Our Health and Safety range now includes Level 1 Health & Safety in Construction leading to CSCS Green card.

## Business Skills

Our range of business skills courses are aimed at individuals and managers wanting to continue their professional development and discover new skills. From Customer Service to Negotiation and Leadership skills there is a wealth of knowledge to choose from. We also offer a suite of social media marketing courses including Facebook, LinkedIn and Twitter.

## Health & Social Care

The Health and Social Care courses we offer are aimed at those working in a care setting and range from Infection Control, Introduction to Early Years to End of Life Care. The courses can all be completed at your own pace and a downloadable certificate is available following completion. We can offer provide all 17 courses that lead to a care certificate.

## Mental Health & Wellbeing

We recognise that mental health and wellbeing awareness has become an increasingly important topic in the workplace over recent years. Our suite of mental health courses can help raise awareness of the mental health of people around you as well as recognising the signs within yourself. The courses cover the mental health of young people, stress management and mental health first aid.

## Hospitality

The hospitality courses we can offer will assist you in achieving your Level 1, 2 and 3 Food Safety exams. We also an Alcohol Personal License Holder course which is intended to provide you with knowledge to pass the test in becoming an Alcohol Personal License Holder. There is also Customer Service and Conflict Negotiation courses available.

# FIRE PROTECTION COURSES

## WHAT IS IT?

AWB and Son Ltd have a wealth of experience and knowledge in the Passive Fire Protection industry. We believe that knowledge is better shared and so we have worked to develop our own range of courses.

## THEORY

Our courses combine the knowledge element of the Association for Specialist Fire Protection's introductory courses with our own purpose built practical training.

The course is available in three levels, Awareness, Introductory and Advanced. The day will start with a theory session and will cover the key elements of design, installation and inspection. The current legislation and regulations that cover the passive fire protection industry will also be discussed.

## PRACTICAL

The second part of the day will involve practical installation of fire stops on our purpose built training rig. We've included real life examples of fire stops that we have encountered in our years of fire stopping repairs and installations. You will be guided by a knowledgeable and experienced trainer that has a number of years experience fire stopping on site.

## AIMS

Our aim is to provide you with all the tools and understanding to come away from our course to competently manage or complete passive fire protection in your own workplace. Whether an installer or an estates manager we want to provide you with the confidence to identify good fire protection in buildings.

For more information on our courses please take a look at our website or contact us using the information below
